Capture the energy of the sun with Sun-Maid Raisins. Ripe, juicy grapes, dried naturally under the bright California sun, become raisins...which are simply fruit and sunshine. Our new *Fruit & Sunshine* recipe book brings you unique recipes that will energize your plans to eat healthier. It's surprising how small changes can make a big difference in leading a healthier lifestyle. Making the right choices—a little at a time—in diet and exercise can yield good results. Now's the time to start!

Balance is important. Dietary experts agree that a balanced diet is the key to starting, and maintaining, a healthy lifestyle. For instance, a healthy eating plan is one that:

- Emphasizes fruits, vegetables, whole grains, and fat-free or low-fat milk and milk products;
- Includes lean meats, poultry, fish, beans, eggs and nuts; and
- Is low in saturated fats, *trans* fats, cholesterol, salt (sodium) and added sugars.

Making the right choices. Healthy eating is not about deprivation—it's about making the right choices. By following these USDA-recommended guidelines, day by day and then week by week (which will go by faster than you think!), you'll find yourself feeling and looking better.

How do raisins fit into these guidelines? Because dried fruit has concentrated nutrients, just 1/4 cup of raisins counts as one of the five 1/2 cup recommended servings (2 1/2 cups total) of fruit per day. Naturally sweet, the little powerhouse raisin packs in fiber, antioxidants, potassium, folate (a B vitamin), vitamin C, iron and calcium with all that stored sunshine.

Recipes that fit *your* lifestyle. Beyond the basics, everyone has their own nutritional needs and concerns. These *Fruit & Sunshine* recipes offer great new ideas for healthy choices that taste really good, too. Here are some of the most common nutritional concerns, and recipes from this book that address them.
